1	TNA: Training Need Assessment	"Training Needs Assessment" (TNA) is the method of determining if a training need exists and, if it does, what training is required to fill the gap. TNA seeks to identify accurately the levels of the present situation in the target surveys, interview, observation, secondary data and/or workshop. The gap between the present status and desired status may indicate problems that in turn can be translated into a training need.	On site	20 - 25 Max	TBD
2	Customized training course on Child Protection	The training course will teach participants the signs and indicators of all forms of child abuse and violence. There are many signs and indicators of abuse, neglect, exploitation, and other forms of maltreatment that you need to be aware of when working with children and vulnerable adults. The participants will be able to respond accurately to the different child protection issues.	On site	20 - 25 Max	TBD
